V.01 DRAFT · OCTOBER 2026 · 63 QUICK GUIDES

BEFORE YOU START

How to use this *playbook*.

01

Find the task

Guides are grouped into the eight HCM Academy topics. Use the contents page, or go to the topic's divider page for its list.

02

Follow the steps

Each guide is one page: when to use it, the steps in order, and the watch-outs that cause send-backs. The same steps are in the matching micro-learning course.

03

Check before you submit

Read the watch-outs before you click Submit. Bad data in is bad data out: what you enter flows into pay, costing, and reports.

Where things are. Oracle: Home page > Our Workforce > Quick Actions (Show More). Employee records: Our Workforce > Employment Info. UKG: Oracle Me tab > Apps > UKG (Kronos) Timesheets. Track approvals with the notifications bell.

This is a V.01 draft. Guides marked Pending SME review were built from Oracle documentation and official sources and are waiting on Vanderbilt review. The payroll calendar and your PCB consultant are the source of truth.

Online. Every guide links to its course at me5231979.github.io/HCM_Academy. Questions: pcb@vanderbilt.edu

Contents.

01 Positions, Recruitment & Hiring 12

Job Architecture overview and how it impacts recruiting decisions 13
When to create a new position vs. update an existing position 14
Create a position 15
Update a position 16
Position management best practices 17
Compensation Management: Getting the Compensation Memo 18
Create a requisition 19
Background checks 20
Convert a pending worker 21
Rehires and eligibility for rehire 22
Staff 23
Interns (Paid and Unpaid) 24
Non-Workers 25
Executive or External Search 26

02 Payroll & Timecards 27

The HCM's role in payroll 28
Weekly time card check 29
Review and approve time cards 35
Enter PTO for an employee 36
UKG: Timecards, Time Off, and Schedules for Managers 37
UKG: Employee Timecards and Time Off 38
Request an off-cycle payment 39
Change salary 40
Process grossed-up additional compensation 41
Add a one-time payment (such as a sign-on bonus) 42
Add a staff supplement 43
Compensation impacts on payroll processing 44

03 Assignments 45

Change Assignment 46
Add Assignment 47
Change Working Hours 48
Direct Reports 49
Promote 50
Transfer or promotion from a requisition 51
Transfer or promotion without a requisition 52
Voluntary termination 53
Reduction in force (RIF) 54
Involuntary termination (misconduct) 55
Ending assignments vs. terminating employment 56
How to handle a termination when an employee has multiple assignments 57
Offboarding process requirements 58

04 Leave Management 59

Entering and managing FMLA/TMLA transactions (continuous vs. intermittent) 60
Leave administration workflows within Oracle 61
Managing Exempt Time Off in Oracle 62

05 Costing Management 63

Costing fundamentals 64
How employee costing impacts payroll and financial reporting 65
When costing must be updated 66
Enter costing for a person 67
Change existing costing 68

06 Student & Faculty Hiring and Assignments 69

Student hiring process and requirements 70
Student Workers 71
Add a Work Relationship or add an Assignment? 72
Student and faculty assignment changes 73

07 Document Records & Reporting 74

HCM Structure and Key Concepts

Overview | 6 min micro-learning | Pending SME review

USE WHEN You are new to Oracle HCM, or a screen uses a term (legal employer, work relationship, assignment) you are not sure about.

1. **Start at the top: the enterprise and the legal employer.**
2. **Know your business unit and department (work unit).**
   - Department is often called a work unit at Vanderbilt and in reports.
3. **Tell a job from a position.**
   - Vanderbilt jobs use six-digit job codes (job architecture).
4. **Understand the grade.**
5. **Read the employment model: person, work relationship, assignment.**
   - A person has only one primary work relationship and one primary assignment in it.
6. **Check the person type before you act.**

TERMS AT A GLANCE

Term	What it means for you
Legal employer	Who legally employs the person
Business unit / department	Where the person sits and is costed by default
Job vs. position	Generic role vs. a specific seat in a department
Work relationship	The employment link to a legal employer
Assignment	Where job, pay, hours, and manager live

WATCH-OUTS

- Changes to a position can flow into every incumbent's assignment. Know which fields the position controls before you edit an assignment.
- Do not reuse or repurpose a position for a different worker type; ask Compensation instead.
- Open item: confirm which person types and work relationship types Vanderbilt uses and what each one means for pay.

Course: me5231979.github.io/HCM_Academy/courses/hcm-structure/ · Sources: Oracle: Overview of Workforce Structures; Oracle: Employment Model; Oracle: Overview of Loading Workers

START HERE

HCM Workflow and Worklists

Oracle HCM | 5 min micro-learning | Pending SME review

USE WHEN You submitted a transaction and need to know where it is, or a task has landed on your worklist.

1. Open the notifications bell at the top of Oracle.
2. Find a transaction you submitted and check its status.
3. Act on tasks assigned to you.
4. Use Request More Information or send back instead of rejecting for small fixes.
5. Withdraw your own transaction if you need to change it.
   - Withdraw is on by default in Oracle; your configuration may differ.
6. Set up delegation before you are out.

WATCH-OUTS

- Check the bell daily, and before every payroll cutoff. A transaction waiting on an approver is not in payroll yet.
- Rejecting means the whole approval chain starts over after resubmission; send back or request information when a small fix is all that is needed.
- Open item: confirm Vanderbilt's approval chains by transaction type, whether delegation is enabled for HCMs, and the exact action labels on screen.

Course: me5231979.github.io/HCM_Academy/courses/workflow-worklists/ · Sources: Oracle: Approval Management Configuration Options for Oracle Fusion Human Capital Management; Oracle: How You Define Approvals for Human Capital Management; Oracle: Worklist and Email Notifications

START HERE

Quick Actions and Viewing Person and Employment Information

Oracle HCM | 5 min micro-learning | Pending SME review

USE WHEN You need to look up a person or start any transaction for someone in your area.

1. From the Oracle Home page, open Our Workforce.
2. Click Show More to see every quick action.
3. Open Employment Info and search for the person.
   - Use person number when names are similar.
4. Read the assignment details.
5. Review the history of changes.
6. Check future-dated changes before you submit anything new.

WATCH-OUTS

- Do not start a transaction until you have confirmed the right person and the right assignment.
- What you can see and do is controlled by your security role; a missing quick action usually means a role issue, not a system error.
- Open item: confirm how HCMs view a record as of a past or future date on the Redwood Employment Info page at Vanderbilt.

Course: me5231979.github.io/HCM_Academy/courses/quick-actions-person-info/ · Sources: Oracle: Overview of Quick Actions; Oracle: Enhanced Redwood Person Search (25A); Oracle: Manage Salary Info from Redwood View Employment Details Page (24D)

START HERE

FERPA Tutorial for Staff

Overview | 6 min micro-learning | Pending SME review

USE WHEN You are working with a student worker's record or someone asks you for information about a student.

1. Know what an education record is.
2. Access requires a legitimate educational interest.
3. Student worker records may be education records.
   - Treat student worker files with FERPA care.
4. Directory information has limits.
5. Get written consent for other disclosures.
6. Do not pass information along.

WATCH-OUTS

- Do not confirm a student's class schedule, grades, or enrollment details to a caller, parent, or outside employer.
- A student who opted out of directory information must not have even directory details released.
- Open item: confirm Vanderbilt's FERPA office or Registrar contact, the required FERPA training, and how student worker records are classified.

Course: me5231979.github.io/HCM_Academy/courses/ferpa-for-staff/ · Sources: U.S. Department of Education: FERPA; U.S. Department of Education: school officials with a legitimate educational interest (FAQ); U.S. Department of Education: FERPA Exceptions Summary

START HERE

I-9 and background check requirements by worker type

Process | 5 min micro-learning | Pending SME review

USE WHEN You are bringing on a new person and need to know which checks must be complete before or soon after they start.

1. Identify the worker type first.
2. Look up the requirement in the table.
3. Have the employee complete I-9 Section 1 by the first day of work.
4. Complete I-9 Section 2 within three business days of the start date.
   - Example: start Monday, Section 2 due Thursday.
5. Wait for clear to start when a background check applies.
6. Request checks manually when there is no requisition.

REQUIREMENTS BY WORKER TYPE

Worker type	I-9	Background check
Student workers	Yes	No
Staff and faculty	Yes	Yes
Campus affiliates	No	Yes
Service Free Stipend	No	No
Student Expense Only	No	No

WATCH-OUTS

- Section 1 cannot wait for the three-day window; it is due on day one.
- New York requires non-criminal background checks before any conditional offer.
- Open item: confirm who completes Section 2 of the I-9 at Vanderbilt, in which system, and how remote hires are handled.

Course: me5231979.github.io/HCM_Academy/courses/i9-background-by-worker-type/ · Sources: USCIS: Completing Section 1, Employee Information and Attestation; USCIS: Completing Section 2, Employer Review and Attestation; USCIS: Handbook for Employers M-274, 2.0 Who Must Complete Form I-9

START HERE

Employee or independent contractor?

Process | 6 min micro-learning | Pending SME review

USE WHEN Someone wants to pay a person for services through a contract or invoice instead of hiring them, especially a student.

1. Ask who controls how the work is done.
2. Ask who controls the business side.
3. Look at the relationship.
4. Apply the DOL economic reality test for wage and hour law.
   - Labels and pay method do not decide status.
5. Treat students who perform services as employees.
6. When in doubt, stop and ask before anyone starts.

WATCH-OUTS

- A request to pay a student by invoice, gift card, or stipend for work performed is a red flag; hire them as an employee.
- Contractors are excluded from the new hire report; employees must be included.
- Open item: confirm Vanderbilt's process and contact for worker classification questions.

Course: me5231979.github.io/HCM_Academy/courses/employee-vs-contractor/ · Sources: IRS: Topic no. 762, Independent contractor vs. employee; DOL: Fact Sheet 13, Employment Relationship Under the FLSA; IRS: Student exception to FICA tax

START HERE

Data integrity: bad data in, bad data out

Overview | 5 min micro-learning | Pending SME review

USE WHEN You are entering or changing any person, position, or assignment data and want to understand why each field matters.

1. Follow the chain from position to pay.
2. Know that positions push values to assignments.
3. Check dates as carefully as values.
4. Remember costing follows the data.
5. Confirm what the position does not set.
6. Review before you submit.
   - Check: person, effective date, position, hours, pay, costing.

WATCH-OUTS

- Fixes after payroll runs become retro adjustments in a later payroll and may mean a late or incorrect paycheck.
- Never reactivate an inactive position or repurpose one across worker types to save time.
- Open item: confirm which data errors Vanderbilt sees most often and who to contact for corrections.

Course: me5231979.github.io/HCM_Academy/courses/data-integrity/ · Sources: Oracle: How Position Synchronization Impacts Assignments; Oracle: Examples of Updating Date-Effective Objects; Oracle: Recalculate Payroll for Retroactive Changes

Interns (Paid and Unpaid) 24
Non-Workers 25
Executive or External Search 26

POSITION MANAGEMENT

Job Architecture overview and how it impacts recruiting decisions

Overview | 4 min micro-learning

USE WHEN You're creating a position or requisition and need to read a job code or title.

1. Six-digit job codes are the job architecture.
2. The job name carries its level.
3. The job name becomes the business title.
4. Compensation picks the job, not you.
5. Skills come with the job.
6. Pay ranges are tied to the job.

WATCH-OUTS

- A requisition whose job code doesn't match the pre-search memo is sent back.
- Ask Compensation or your engagement consultant for the deck that shows the tracks and levels.

Course: me5231979.github.io/HCM_Academy/courses/job-architecture/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026; HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

POSITION MANAGEMENT

When to create a new position vs. update an existing position

Overview | 4 min micro-learning

USE WHEN You're about to post or change a role and aren't sure whether to create or update a position.

1. Create a new position for a new role.
2. Create a new one instead of reactivating an inactive position.
3. Create a new one instead of repurposing a vacant position for a different worker type.
4. Create a new one when the business unit changes.
5. Update the position when the same role changes.
6. Fix the position before any requisition.

WATCH-OUTS

- Unsure? Ask your engagement consultant before you build anything.

Course: me5231979.github.io/HCM_Academy/courses/new-vs-update-position/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026; HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

POSITION MANAGEMENT

Create a position

Oracle HCM | 8 min micro-learning

USE WHEN You need a new position to recruit and hire into.

1. Open Positions.
2. Click Add (or Create).
3. Effective date: today, not the start date.
4. Status: Active. Action reason: New Position.
5. Business unit, name, and code.
6. Work unit: the department.
7. Job: enter the six-digit job code from the pre-search memo.
8. Location: where the person would sit on site.
9. Assignment category: the one on the memo.
10. Hours: keep Standard working hours at 40; set Working hours to the actual hours.
11. Headcount and type.
12. Overlap allowed: Yes. Then set Term or Flex if it applies.
    - Temporary: six months or less.
    - Term: a fixed role longer than six months, up to a year.
    - Flex: needed only part of the year, such as summer help who return each year. Usually non-exempt; set as temporary with 20 working hours so benefits don't kick in.
13. Attach the pre-search memo and position description, add comments, and click Submit.

FIELDS THAT GET POSITIONS SENT BACK

Field	Do this
Standard working hours	Always 40. Put actual hours in Working hours.
Job	Six-digit code from the memo. No four- or five-digit codes (except VTS).
Assignment category	Never Professional salaried non-exempt. VTS is always temporary.
Manager	Leave blank.
Attachments	Pre-search memo (required) and position description.

WATCH-OUTS

- Don't reactivate an inactive position. Old job codes on it can block updates and approval. Create a new one.
- Don't repurpose an unused position that was built for a different worker type (for example, a student position for staff). Create a new one.
- The requisition copies the position when it is submitted. Fix the position before you create the requisition.

Course: me5231979.github.io/HCM_Academy/courses/create-position/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026

POSITION MANAGEMENT

Update a position

Oracle HCM | 6 min micro-learning

USE WHEN A position's name, job code, or category changes, such as a reclassification.

1. Open the position.
2. Choose Update and enter the effective date.
3. Pick the action reason that matches the change.
4. Change the fields that changed.
5. Attach the reclass memo, add comments, and click Submit.
6. After approval, update the incumbent's assignment for what didn't flow.

WATCH-OUTS

- Position changes never reach an existing requisition. The requisition keeps the position as it was when submitted.
- Reclassifications need Compensation's reclass memo before you update the position.

Course: me5231979.github.io/HCM_Academy/courses/update-position/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026

POSITION MANAGEMENT

Position management best practices

Overview | 4 min micro-learning

USE WHEN You manage positions for your business unit and want to avoid send-backs.

1. Create new; don't reactivate or repurpose.
2. Use six-digit job codes only.
3. Get the memo first.
4. Standard working hours are always 40.
5. Leave Manager blank on the position.
6. Set the real location.
7. Fix the position before the requisition.
8. Keep documents on the position.

WATCH-OUTS

- When in doubt about a code, category, or location, ask your engagement consultant before you submit.

Course: me5231979.github.io/HCM_Academy/courses/position-best-practices/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026; HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

HIRING

Compensation Management: Getting the Compensation Memo

Process | 4 min micro-learning

USE WHEN You need a new staff or non-exempt position, or a reclassification.

1. Work with your engagement consultant on the position description.
2. Request the review from Compensation.
3. Include the work location.
4. Compensation sends the memo.
5. Use the memo to build the position.
6. Attach it to the requisition too.

> **WATCH-OUTS**
> - VTS temporary positions don't need a memo.
> - A memo older than 12 months means a new request.

Course: me5231979.github.io/HCM_Academy/courses/compensation-memo/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026; HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

HIRING

Create a requisition

Oracle Recruiting | 9 min micro-learning

USE WHEN An approved position needs to be posted and recruited for.

1. Check the position first.
2. Open Hiring and click Create.
3. Choose Standard and select the position.
4. Requisition title: the posting title.
5. Justification and openings.
   - Each opening is billed, and unfilled openings are billed at 50% to cancel.
   - More than one opening also goes to central finance for approval.
6. Hiring manager and collaborators.
7. Requisition type: Standard or Abbreviated.
   - Executive search is only for Cielo's executive search program. An outside firm (such as Korn Ferry) needs a PO requisition, not a recruiting requisition.
8. Organization and primary location.
9. Required details.
10. Description: paste the position description.
11. Offer info: workplace type.
12. Attach the position description and pre-search memo.
13. Configuration: candidate selection process and background check.
    - New York requires non-criminal checks before any conditional offer. The wrong process breaks that law.
14. Click Save, then Submit.

WATCH-OUTS

- Never select Unlimited openings.
- Never use United States as the location.
- New York: New York candidate selection process and account VAN09, every time.

Course: me5231979.github.io/HCM_Academy/courses/create-requisition/ · Sources: HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

HIRING

Background checks

Process | 4 min micro-learning

USE WHEN You're hiring someone and need to know when they're cleared to start.

1. Set it up on the requisition.
2. New York has its own order.
3. The recruiter picks the packages at the offer.
4. PEBC clears the candidate.
5. Then convert the pending worker.
6. Not on a requisition? Request it manually.

WATCH-OUTS

- Work with minors = Yes adds a protection of minors check.
- Not sure where a candidate stands? Ask central recruiting before you create a direct hire.

Course: me5231979.github.io/HCM_Academy/courses/background-checks/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026; HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

HIRING

Convert a pending worker

Oracle HCM | 10 min micro-learning

USE WHEN You got the clear to start email and the new hire is in your pending workers list.

1. Open Pending Workers.
2. Click the three dots next to the person, then Convert.
3. Select the sections you'll update.
4. When and why: action Hire, reason Employment.
   - Service free appointment: only for students receiving a stipend.
   - Non-employment: affiliates.
5. Check the business unit and position.
6. Biographical info: confirm date of birth and citizenship.
7. National ID: Social Security number or a placeholder.
8. Home address must be in the United States.
9. Position overrides: review and continue.
10. Assignment: person type, location, minors, expense account, status.
    - Location: override to where they'll actually work if remote (for example, Florida).
    - Working with minors: required; Yes triggers an additional check.
    - Default expense account: your department's usual account.
    - Assignment status: Active payroll eligible for anyone paid. Active no payroll only for affiliates; they won't appear in payroll even with a salary.
11. Managers and work relationship.
12. Payroll details.
13. Salary: enter what they'll actually be paid.
14. Review compensation, attach the offer letter, and click Submit.

WATCH-OUTS

- Never Quick Convert or Edit Pending Worker. Use Convert.
- Active no payroll means no pay at all. Use it only for unpaid affiliates.
- Not sure where a hire or transfer stands? Ask central recruiting before you create a direct hire.

Course: me5231979.github.io/HCM_Academy/courses/convert-pending-worker/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026

HIRING

Rehires and eligibility for rehire

Oracle Recruiting | 5 min micro-learning | Pending SME review

USE WHEN A candidate you want to hire used to work at Vanderbilt, or you are terminating someone and need to set the rehire field.

1. **Know that the rehire field is set at termination.**
   - Misconduct: No or Not specified, per your PCB consultant.
2. **Check the former employee's record before you commit.**
3. **Let the recruiter review eligible for rehire.**
4. **Never create a second person record.**
5. **Convert the pending worker as you would any hire.**
6. **Review costing on the new assignment.**

REHIRE RECOMMENDATION AT A GLANCE

Value on termination	What it means for a rehire
Yes	Eligible; recruiter proceeds through the normal process.
No	Not eligible without review; talk to the recruiter and your PCB consultant.
Not specified	Treat as a flag; ask before moving forward.

WATCH-OUTS

- The rehire field is only as good as the termination entry. Set it carefully when you terminate someone; recruiters rely on it later.
- Search inactive records before hiring a familiar name. A duplicate person record is hard to undo.
- Open item: confirm with your engagement consultant (EC) who can approve rehiring someone marked No, and how Not specified is handled.

Course: me5231979.github.io/HCM_Academy/courses/rehire-eligibility/ · Sources: Oracle: Rehire a Worker; Oracle: Attributes for Worker Work Relationship

HIRING

Staff

Process | 6 min micro-learning | Pending SME review

USE WHEN You need to hire a staff member and want to see every step from requisition to start date.

1. Get the pre-search memo from Compensation.
2. Create the position (or update one that fits).
3. Create the requisition from the approved position.
4. Work with the recruiter through interviews and the offer.
5. Wait for background check clearance from PEBC.
6. Convert the pending worker.
7. Check costing on day one.

WATCH-OUTS

- Most hire problems start at the position. A wrong location, hours, or job code flows into the posting, the offer, and the first paycheck.
- Don't convert until PEBC sends clear to start.
- Open item: confirm with your engagement consultant (EC) any lead times between steps your area should plan for.

Course: me5231979.github.io/HCM_Academy/courses/hire-staff/ · Sources: Vanderbilt HCM training sessions; Oracle: How You Convert Pending Workers

HIRING

Interns (Paid and Unpaid)

Overview | 6 min micro-learning | Pending SME review

USE WHEN Someone wants to bring on an intern, and you need to know whether the person must be paid and how to set them up.

1. **Start with one question: will the intern be paid?**
2. **For an unpaid internship, apply the primary beneficiary test.**
   - Clear understanding that there is no pay.
   - Training similar to an educational setting.
   - Tied to coursework or academic credit, and to the academic calendar.
3. **Check that the intern does not displace paid work.**
4. **Limit the internship to its learning period.**
5. **If the test is unclear, treat it as paid and ask.**
6. **Set up the person with the right worker type and checks.**

PAID VS. UNPAID AT A GLANCE

Item	Paid intern	Unpaid intern
Status	Employee	Not an employee only if the intern is the primary beneficiary
Pay	At least minimum wage and overtime	None; no expectation of pay
Setup in Oracle	Hire for the worker type	Open item: confirm category with your EC

WATCH-OUTS

- An unpaid intern who does regular work for the department may legally be an employee. Decide before the start date, not after.
- Open item: confirm with your engagement consultant (EC) which Oracle worker type and category Vanderbilt uses for paid and unpaid interns, and which checks apply.
- Open item: confirm with your EC whether any state where the intern works has stricter internship rules.

Course: me5231979.github.io/HCM_Academy/courses/hire-interns/ · Sources: DOL: Fact Sheet #71, Internship Programs Under the FLSA; DOL: Field Assistance Bulletin 2018-2

HIRING

Non-Workers

Oracle HCM | 3 min micro-learning

USE WHEN Someone needs access but isn't an employee and won't be paid.

1. Hire reason: Non-employment.
2. Assignment status: Active no payroll.
3. Work relationship: Exclude from the new hire report.

> **WATCH-OUTS**
> - Never use Active no payroll for someone who should be paid. They won't be.
> - Affiliates on campus need a background check but not an I-9.

Course: me5231979.github.io/HCM_Academy/courses/hire-non-worker/ · Sources: HCM training session 1, positions and pending workers (Andres Castro, Stephanie Commo), Sep 8, 2026

HIRING

Executive or External Search

Oracle Recruiting | 3 min micro-learning

USE WHEN The role will be filled through an executive search or an outside search firm.

1. Cielo's executive search program: a recruiting requisition marked Executive search.
2. Any other firm (for example, Korn Ferry): a PO requisition, not a recruiting requisition.
3. Everything else: Standard or Abbreviated.

WATCH-OUTS

- Confirm with central recruiting before you start an executive search.

Course: me5231979.github.io/HCM_Academy/courses/executive-search/ · Sources: HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

PAYROLL & TIMECARDS

The HCM's role in payroll

Overview | 5 min micro-learning

USE WHEN You are new to the HCM role, or you are not sure whether a pay issue is yours to fix.

1. **All new hires: you own the hire.**
   - Process the hire correctly.
   - Confirm every payroll element is on the record.
2. **Exempt (monthly) employees: hands off, with two exceptions.**
   - Add a compensation payment when needed, such as a lump sum.
   - Work an issue with payroll when one comes up.
3. **Weekly and biweekly employees: check time cards every week.**
   - Confirm every time card is submitted.
   - Chase managers for missing or late time cards.
   - Escalate errors you can't resolve to payroll.
4. **Errors: you work them with payroll.**

WATCH-OUTS

- Never try to run or rerun payroll yourself. That is payroll's job.
- Open item: the exact payroll elements to confirm at hire are still being documented with the payroll team.

Course: me5231979.github.io/HCM_Academy/courses/hcm-role-in-payroll/ · Sources: Jennifer Garcia session, Oct 19

PAYROLL & TIMECARDS

Weekly time card check

UKG (Kronos) | 6 min micro-learning

USE WHEN Every week, for your weekly and biweekly (non-exempt) employees.

1. Open UKG from Oracle.
2. Open the current pay period for your employees.
   - Filter: in the row under the column headings, type your business unit under Business Unit (or your work unit under Work Unit), then select Refresh.
3. Review each employee's punches.
4. Compare the punches to the employee's schedule.
5. Confirm every time card is complete and approved.
6. Missing or late time card: contact the manager.
7. An error you can't resolve: contact payroll.

> **WATCH-OUTS**
> - Empty time cards early in an open period are normal.
> - In an open period, Save. Don't Submit.

Course: me5231979.github.io/HCM_Academy/courses/weekly-time-card-check/ · Sources: Jennifer Garcia session, Oct 19; Briana Knowles walkthrough, Oct 20

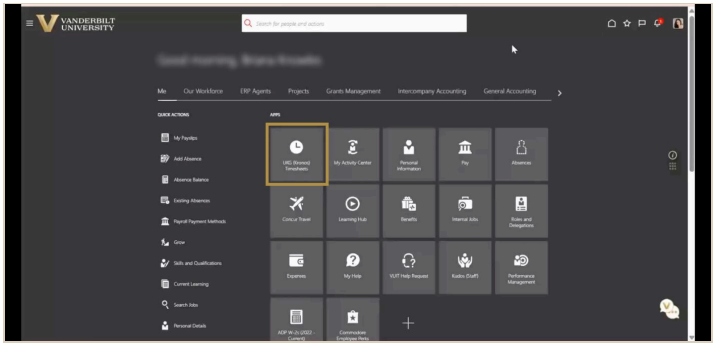

DETAILED JOB AID · WEEKLY TIME CARD CHECK

Managing time cards and PTO in UKG

Guidde walkthrough by Briana Knowles. Names, IDs, and usernames are blurred.

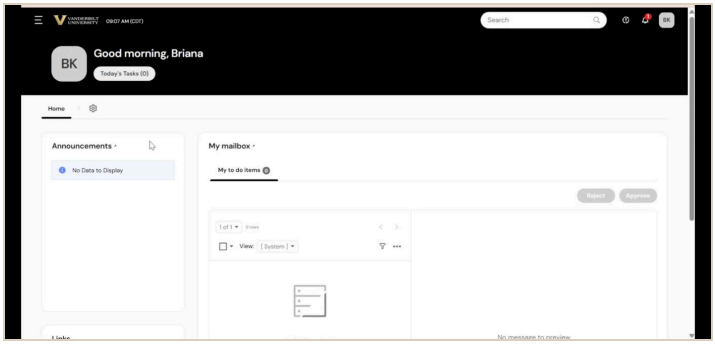

01 Open UKG from Oracle.

On the Oracle Home page, on the Me tab, under Apps, select UKG (Kronos) Timesheets.

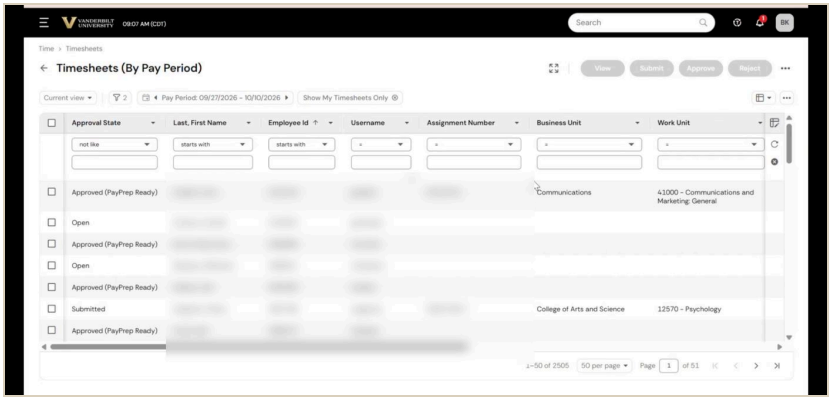

02 Open the pay period list.

On the UKG Home page, scroll down to Links and select By Pay Period. Timesheets (By Pay Period) opens on the most recently completed pay period.

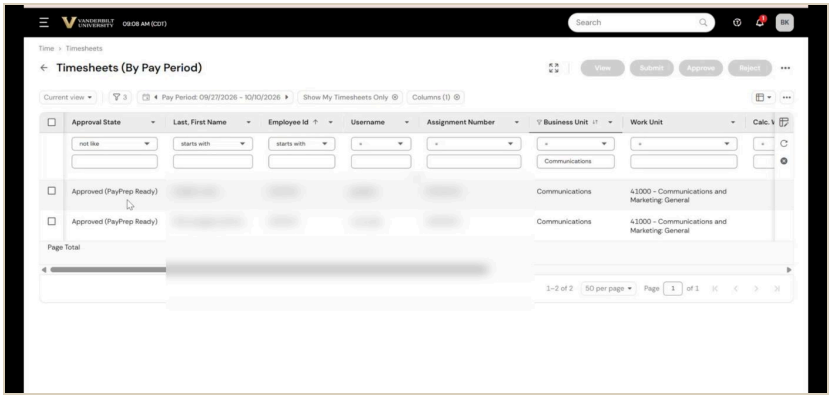

03 Filter to your employees.

Use the filter row under the column headings. In this example, type the business unit under Business Unit, then select Refresh (the circular arrow at the right) to update the list.

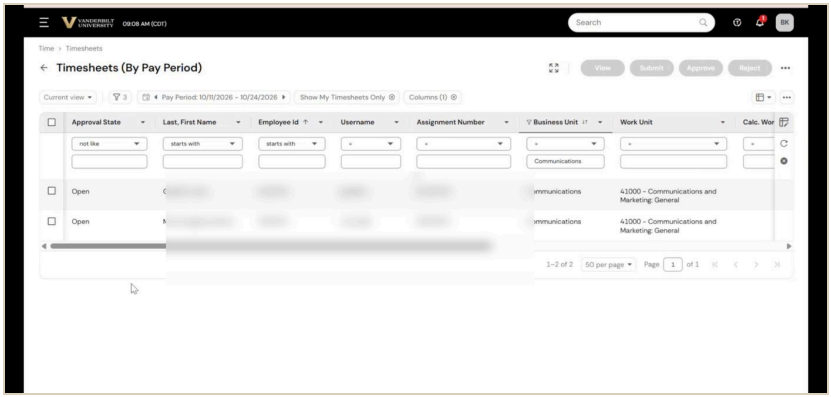

04 Choose the pay period.

Use the arrows to the left and right of Pay Period to move between periods. The date range shows the period you're reviewing.

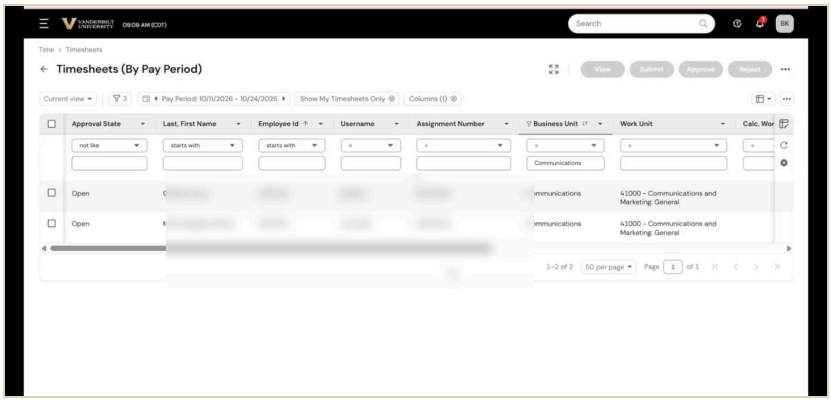

05 Approve or edit time cards.

Entering time is the employee's job. To act on a time card, check the box next to the employee's name, then choose Submit, Approve, or Reject at the top. To enter time for them (a system glitch, or a secondary time type such as PTO), open the time card, enter the time, and click Save. In an open pay period, don't Submit; you'd have to edit, update, and resubmit it later.

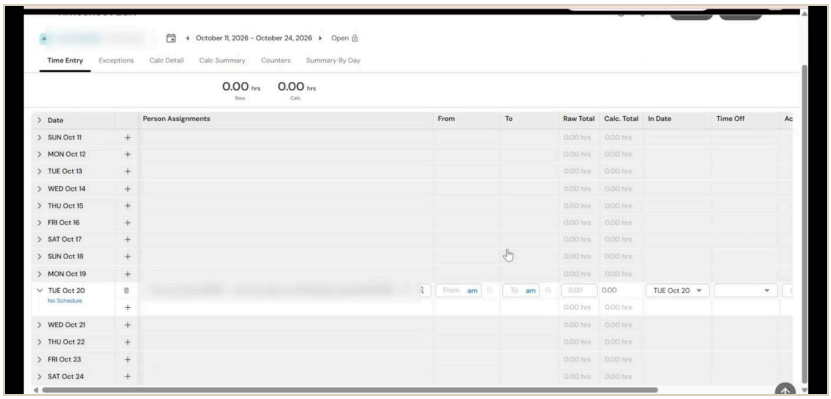

06 Open the time card to enter PTO.

Select the employee's name to open their time card.

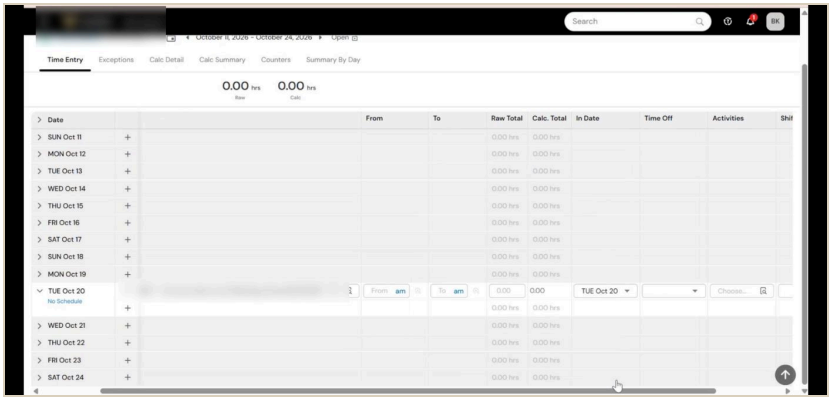

07 Add a row on the day.

Find the day and click + to add a row. The new row shows the employee's assignment.

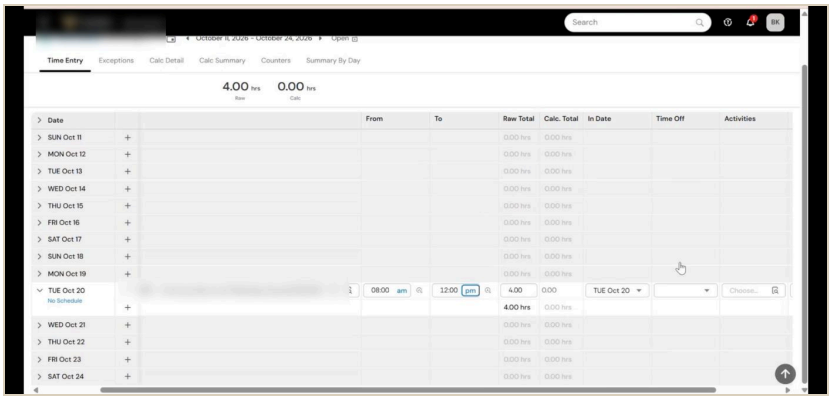

08 Enter the hours.

Non-exempt PTO can be entered in 4-hour increments. Enter From and To, for example 8:00 am to 12:00 pm.

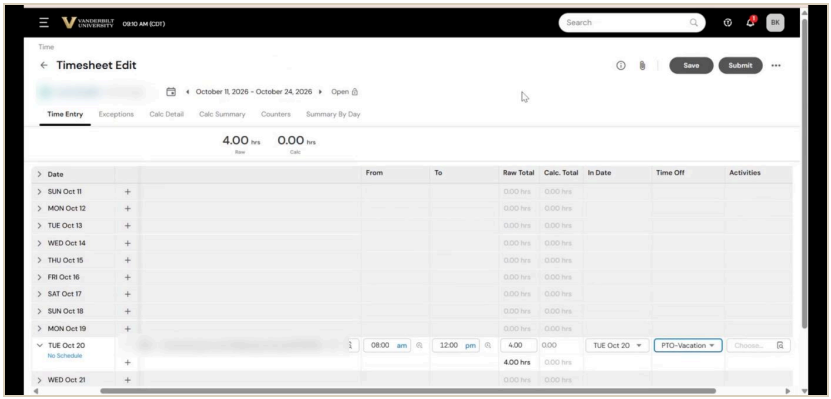

09 Choose the PTO type.

Raw Total shows 4.00. In the Time Off column, click Browse and pick the pay code, for example PTO-Vacation.

10 Save. Don't Submit.

Scroll up and click Save at the top right of Timesheet Edit. In an open pay period, leave it saved; don't Submit.

PAYROLL & TIMECARDS

Review and approve time cards

UKG (Kronos) | 7 min micro-learning

USE WHEN You are checking or approving non-exempt hours for a pay period.

1. Open UKG from Oracle.
2. Open the time cards for your employees.
   - Filter: in the row under the column headings, type your business unit under Business Unit (or your work unit under Work Unit), then select Refresh. Until you filter, the list shows everyone you have access to.
   - Each row shows the Approval State: Open, Submitted, or Approved (PayPrep Ready).
3. Review each employee's status and hours.
4. To check the open period, move to the current pay period.
5. Act on a time card.
   - Approve: the hours are correct and ready for payroll.
   - Submit on their behalf: the employee couldn't submit.
   - Reject: send it back so it can be corrected.
6. To enter hours for an employee, add a row on their time card and click Save.
   - In an open period, Save only. Don't submit.
7. Confirm the result.

WATCH-OUTS

- Empty time cards early in an open period are normal.
- In an open period, Save. Don't Submit. Submitting means you must edit, update, and resubmit later.
- Once payroll signs off a time card, an approval can't be removed unless the sign-off is removed first.

Course: me5231979.github.io/HCM_Academy/courses/review-approve-time-cards/ · Sources: Briana Knowles walkthrough, Oct 20

PAYROLL & TIMECARDS

Enter PTO for an employee

UKG (Kronos) | 5 min micro-learning

USE WHEN A non-exempt employee needs PTO entered and can't do it themselves.

1. Open UKG from Oracle.
2. Open the employee's time card.
3. Add a row on the day of the absence.
4. Choose the PTO type: in the Time Off column, click Browse and pick the pay code, such as PTO-Vacation.
5. Enter the time.
6. Scroll up and click Save.
7. Exit and reopen the time card to confirm the entry saved.

WATCH-OUTS

- Non-exempt PTO can be entered in 4-hour increments.
- Open period: Save only. Do not submit.
- PTO that came from an approved time off request may not be editable on the time card. Check with the manager before changing it.

Course: me5231979.github.io/HCM_Academy/courses/enter-pto/ · Sources: Briana Knowles walkthrough, Oct 20

PAYROLL & TIMECARDS

UKG: Timecards, Time Off, and Schedules for Managers

UKG (Kronos) | 6 min micro-learning | Pending SME review

USE WHEN A manager asks how to approve time, fix a missed punch, or respond to a time-off request, or a time card is not approved near the pay deadline.

1. Open UKG from Oracle: Me tab > Apps > UKG (Kronos) Timesheets.
2. Know the approval chain: employee approves, manager approves, payroll signs off.
   - Employee approves own time card
   - Manager approves
   - Payroll signs off
3. Check the Approval State column for each employee.
4. Resolve exceptions, such as missed punches, before approving.
5. Review pending timecard changes the employee submitted.
6. Approve or refuse time-off requests in Control Center.
7. View schedules to confirm expected hours.
8. Follow up weekly until every time card shows Approved.

APPROVAL STATE COLUMN

State	What it means for you
Open	Not yet submitted or approved; follow up with employee and manager
Submitted	Employee is done; manager approval is still needed
Approved (PayPrep Ready)	Ready for payroll; no action needed

WATCH-OUTS

- Managers approve; payroll signs off. If a correction is needed after sign-off, contact payroll; the manager cannot simply remove approval.
- Exempt employees' time off is managed in Oracle, not UKG. Only non-exempt time off is approved in UKG.
- Open item: confirm the exact manager screens Vanderbilt uses (Manage Timecards, Control Center, schedule views), any delegate approver setup, and the manager approval deadline each pay period.

Course: me5231979.github.io/HCM_Academy/courses/ukg-for-managers/ · Sources: UKG: Sign-off timecards; UKG: Resolve timecard exceptions (hourly timecard); UKG: Approve or deny a submitted timecard change (Pending Changes); UKG: Respond to time-off requests in Control Center

PAYROLL & TIMECARDS

UKG: Employee Timecards and Time Off

UKG (Kronos) | 6 min micro-learning | Pending SME review

USE WHEN A non-exempt employee asks how to enter time, fix a missed punch, approve their timecard, request PTO, or check their balance.

1. Open UKG from Oracle: Me tab > Apps > UKG (Kronos) Timesheets.
2. Enter or punch time for each day worked.
3. In an open pay period, Save, don't Submit.
4. Approve your own timecard when the period is complete.
   - Approval State: Open, Submitted, Approved (PayPrep Ready)
5. Request PTO: add a row with +, then Browse in the Time Off column for the pay code.
   - 4-hour increments
   - Example pay code: PTO-Vacation
6. Check accrual balances before requesting time off.

WATCH-OUTS

- Exempt employees do not use UKG for time off; their time off is managed in Oracle.
- If time is not approved by employee and manager, non-exempt pay can be delayed. Check time cards weekly.
- Open item: confirm whether Vanderbilt employees punch at clocks, use web or mobile punch, or enter hours on a timesheet, and which accrual balances display.

Course: me5231979.github.io/HCM_Academy/courses/ukg-for-employees/ · Sources: UKG: My Timecard, hourly view; UKG: Approve and sign off your timecard; UKG: Request Time Off from My Calendar; UKG: Time Off and Allowances

PAYROLL & TIMECARDS

Request an off-cycle payment

Oracle HCM + off-cycle request form | 6 min micro-learning

USE WHEN A transaction failed to pay and it was not the employee's or HCM's fault.

1. Submit, or resubmit, the Oracle transaction.
2. Open the off-cycle paycheck request form.
3. Select the reason.
4. Confirm it meets the criteria shown on the form.
5. Submit the form.
6. Contact payroll.
7. Payroll pays it in the next off-cycle run.

WATCH-OUTS

- The form and the Oracle transaction go together. One without the other won't pay.
- Off-cycle is the only way exempt staff are paid outside the monthly payroll.

Course: me5231979.github.io/HCM_Academy/courses/off-cycle-payment/ · Sources: Briana Knowles walkthrough, Oct 20

COMPENSATION MANAGEMENT

Change salary

Oracle HCM | 8 min micro-learning

USE WHEN A salary changes outside the annual increase process.

1. **Open Change Salary for the employee.**
   - Quick Actions > Change Salary > select the employee, or
   - Search the employee's name > Change Salary.
2. **Enter the effective date: when the new salary starts.**
3. **Action: Change salary. Pick the reason.**
4. **Click Continue.**
5. **Enter the new salary.**
   - A new amount (for example, $85,000), or
   - A percentage increase (for example, 2%).
6. **Review, then click Continue.**
7. **File the supporting document on the personnel record.**
8. **Add comments and attachments, then click Submit.**

REASONS YOU'LL USE MOST

Reason	When
Retention	Keeping a flight risk. The most common outside annual increases.
Reclass	Role reclassification. Also common.
Market	Pay adjusted to market. Less common.
Counteroffer, Equity	As named.
Central HR update	Catch-all that needs documentation. Used for an FTE drop, such as 1.0 to 0.75 for an accommodation.
Exempt / non-exempt change	Status change in either direction (FLSA exempt salary or FLSA non-exempt hourly).
Change in working hours	Salary only. Change the hours too: use Change Assignment with Salary selected.

WATCH-OUTS

- Annual increases and union requests have their own reasons. Don't use them for off-cycle changes.
- Direct-hire reasons (no requisition) appear in the list. Ignore them here.
- Oracle needs little in comments and attachments, but many departmental finance approvers want more. Confirm what your finance partner expects before you submit.
- Exempt (monthly) payroll cutoff is around the 18th, usually the 15th to 18th, and earlier in December. The payroll calendar is the source of truth.

Course: me5231979.github.io/HCM_Academy/courses/change-salary/ · Sources: Briana Knowles walkthrough, Oct 20; Personnel Files: Document Records, Oracle User Guide

COMPENSATION MANAGEMENT

Process grossed-up additional compensation

Oracle HCM | 6 min micro-learning

USE WHEN The employee should take home an exact amount of additional compensation.

1. Open Individual Compensation for the employee.
   - Quick Actions > Individual Compensation > select the employee, or
   - Search the employee's name > Individual Compensation.
2. Click Add, then choose One-time or recurring payment.
3. Plan: Lump sum payment.
4. Start date: the first day of the target payroll month.
5. Enter the amount in the Net field (for example, $500).
6. Leave Process separately set to Yes.
7. Click Save.
8. Submit, or click Continue to add comments or attachments first.

WATCH-OUTS

- Missed the cutoff (around the 18th)? Date it for next month.
- Only change Process separately if payroll tells you to.
- Pay goes to direct deposit, which is required.
- Set the effective as-of date in Individual Compensation before you search for the employee. Otherwise you can't pick an earlier start date.
- Attach the manager's request (email or memo) and say what the payment is for, so the approver doesn't send it back.

Course: me5231979.github.io/HCM_Academy/courses/net-one-time-stipend/ · Sources: Briana Knowles walkthrough, Oct 20

COMPENSATION MANAGEMENT

Add a one-time payment (such as a sign-on bonus)

Oracle HCM | 6 min micro-learning

USE WHEN A taxable one-time payment needs to be added, such as a sign-on bonus left off the offer.

1. Open Individual Compensation for the employee.
2. Click Add, then choose One-time or recurring payment.
3. Plan: pick the payment type, such as Bonus.
4. Start date: the first day of the target payroll month (for example, Nov 1).
5. Enter the amount in the Amount field, not Net (for example, $1,500).
6. Leave Process separately set to Yes, then click Save.
7. Click Continue, add comments or attachments, then Submit.

WATCH-OUTS

- Set the effective as-of date in Individual Compensation before you search for the employee. Otherwise you can't pick an earlier start date.
- Adding the bonus to the offer is the preferred path. It processes in one transaction and reduces Oracle failures.
- Amount = gross. Net = take-home. Mixing them up changes what the employee receives.

Course: me5231979.github.io/HCM_Academy/courses/sign-on-bonus/ · Sources: Briana Knowles walkthrough, Oct 20; Award Compensation Elements Resource Guide (updated 01/17/2023)

COMPENSATION MANAGEMENT

Add a staff supplement

Oracle HCM | 7 min micro-learning

USE WHEN Someone takes on extra duties for a period of time.

1. Open Individual Compensation for the employee.
2. Click Add, then choose Add staff supplement.
3. Plan: choose the supplement type.
4. Enter the amount.
5. Leave Process separately set to Yes.
6. Start date: the first day of the target payroll month (for example, Nov 1).
7. Set the end date.
   - Unknown end: leave Ongoing on.
   - Known end: turn Ongoing off and enter the end date (for example, Dec 31).
8. Click Save and confirm every field.
9. Click Continue for comments or attachments, then Submit.

WHICH SUPPLEMENT (FROM THE AWARD COMPENSATION GUIDE)

Plan (code)	Use for
Administrative Supplement (ADS)	Acting or interim in an administrative vacancy while a search runs. Expected less than a year.
Interim Appointment Supplement (INTERIM)	Same situation, expected 12 months or more.
Temporary Supplement (TEMPSUP)	Short-term additional responsibilities.
Not for	Faculty, post-docs, students, or temps. Faculty have their own supplements.

WATCH-OUTS

- Ongoing supplements keep paying until someone ends them. Set a reminder.
- Guide dated 01/17/2023. Confirm current plan names with finance.

Course: me5231979.github.io/HCM_Academy/courses/staff-supplement/ · Sources: Briana Knowles walkthrough, Oct 20; Award Compensation Elements Resource Guide (updated 01/17/2023)

COMPENSATION MANAGEMENT

Compensation impacts on payroll processing

Oracle HCM | 7 min micro-learning | Pending SME review

USE WHEN You are entering or reviewing a pay change and need to know which paycheck it will hit.

1. The salary basis decides how pay is stored.
2. Saving a salary change writes the person's element entry.
3. The effective date says when the pay is earned; the cutoff says when it is paid.
   - Check the payroll calendar, not memory
4. Backdated changes pay through retroactive processing.
5. Some earnings are set to Process separately.
6. Confirm the result before payday.

WHICH PAYCHECK WILL IT HIT?

Situation	Typical result
Approved before cutoff, effective this period	Paid this period
Approved after cutoff, effective this period	Paid next period with retro
Effective date in a past, paid period	Retro difference paid in a later run
Hourly rate change, non-exempt	Applies to approved UKG hours in the period

WATCH-OUTS

- Pending approvals do not pay. A change still waiting in approvals at cutoff misses that payroll.
- Retro only covers elements set up for retroactive pay. Do not promise a retro amount; payroll calculates it.
- Open item: confirm with payroll which Vanderbilt earnings use Process separately and how retro shows on the payslip.

Course: me5231979.github.io/HCM_Academy/courses/comp-impacts-payroll/ · Sources: Oracle: How You Store the Salary Amount and Pass It to Payroll for Processing; Oracle: How Retroactive Pay Is Calculated; Oracle: How do I define earnings elements for the US

03

SECTION 03

Assignments

Changes for people already in a job: assignment updates, transfers and promotions, and leaving.

Change Assignment 46
Add Assignment 47
Change Working Hours 48
Direct Reports 49
Promote 50
Transfer or promotion from a requisition 51
Transfer or promotion without a requisition 52
Voluntary termination 53
Reduction in force (RIF) 54
Involuntary termination (misconduct) 55
Ending assignments vs. terminating employment 56
How to handle a termination when an employee has multiple assignments 57
Offboarding process requirements 58

ASSIGNMENT CHANGES

Change Assignment

Oracle HCM | 6 min micro-learning

USE WHEN An employee's assignment needs an update, such as location, hours, business title, or person type.

1. Open the employee's Employment Info.
2. Pick the action.
3. Select any extra sections you'll update.
4. Enter the effective date.
5. Action: Assignment change. Pick the reason.
6. Update the fields.
7. Review salary if you selected it, then Submit.

WATCH-OUTS

- Don't change an employee's position here. Moving someone to another position in your business unit is a transfer, so it's tracked and reported.
- After a position reclassification, person type, location, working hours, and hourly salary don't flow from the position. Update them here.

Course: me5231979.github.io/HCM_Academy/courses/change-assignment/ · Sources: HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

ASSIGNMENT CHANGES

Add Assignment

Oracle HCM | 5 min micro-learning | Pending SME review

USE WHEN An employee already in Oracle is taking on a second job in addition to the one they have.

1. **Confirm the person already has an active employee (E) assignment.**
   - E assignment: add an assignment
   - N record only: add the work relationship
2. **Confirm the position for the new job exists and is correct.**
3. **Open Add Assignment from Our Workforce > Quick Actions.**
4. **Enter the When and why: start date and action reason.**
5. **Enter the assignment: position, hours, and primary flag.**
   - Only one assignment can be primary
6. **Enter salary and payroll details for the new assignment.**
7. **Review, submit, and track approval.**

WATCH-OUTS

- Each assignment has its own costing, hours, and pay. Review costing for the new assignment; blank costing means it uses the work unit default.
- Changing which assignment is primary affects what shows as the person's main job. Change it only on purpose.
- Open item: confirm Vanderbilt's action reasons for an added assignment and whether a second assignment needs a pre-approval from Compensation or your PCB consultant.

Course: me5231979.github.io/HCM_Academy/courses/add-assignment/ · Sources: Oracle: Using Global Human Resources, Work Relationships; Oracle: Direct Reports Step Available in Redwood Add Assignment Processes (24D)

ASSIGNMENT CHANGES

Change Working Hours

Oracle HCM | 4 min micro-learning

USE WHEN An employee's scheduled hours or FTE change.

1. Open Employment Info and choose Change Assignment.
2. Effective date, action Assignment change, and reason.
3. Change Working hours.
4. Check the salary.
5. Add comments and attachments, then Submit.

WATCH-OUTS

- Change Salary with the reason Change in working hours changes only the salary. The hours still need their own transaction, so prefer Change Assignment with Salary selected.

Course: me5231979.github.io/HCM_Academy/courses/change-working-hours/ · Sources: HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

ASSIGNMENT CHANGES

Direct Reports

Oracle HCM | 4 min micro-learning | Pending SME review

USE WHEN A manager is leaving, moving, or handing off their team, and their direct reports need a new manager.

1. **Decide: one employee or a whole team?**
   - One person: Change Manager
   - A manager's team: Direct Reports
2. **Open the manager's record in Our Workforce > Employment Info.**
3. **Set the effective date.**
4. **Select the reports to move and the new manager for each.**
5. **Review, submit, and confirm.**

> **WATCH-OUTS**
> - Do this before you terminate the manager. Reports left on a terminated manager leave approvals with no one to act on them.
> - Oracle moves at most 50 reports at a time on these pages. Split larger teams into batches.
> - Open item: confirm whether a new manager needs a manager role or UKG approver setup at Vanderbilt; Oracle notes the Direct Reports task does not grant manager roles.

Course: me5231979.github.io/HCM_Academy/courses/direct-reports/ · Sources: Oracle: How You Reassign Direct Reports; Oracle: What's the difference between the Change Manager and Direct Reports functionality?; Oracle: Redwood Experience for Direct Reports Process (24A)

ASSIGNMENT CHANGES

Promote

Oracle HCM | 6 min micro-learning | Pending SME review

USE WHEN An employee is moving up to a higher job, with or without a posted requisition.

1. Check who processes it: requisition or no requisition.
   - Requisition: PCB Internal TA
   - No requisition: you submit
2. Confirm the target position exists with the correct six-digit job code.
3. Pick the action: Promote or Promote and Change Position.
4. Open it from Our Workforce > Quick Actions and select the person.
5. Enter When and why: effective date and promotion reason.
6. Update the assignment and the salary.
7. Review, submit, and track approval.

WATCH-OUTS

- After a position change, person type, location, working hours, and hourly salary do not flow from the position. Check them on the assignment.
- Moving someone to a different position in your business unit at the same level is a transfer, not a promotion or Change Assignment.
- Open item: confirm Vanderbilt's promotion action reasons and any Compensation approval needed for the new salary.

Course: me5231979.github.io/HCM_Academy/courses/promote/ · Sources: Oracle: Redwood Experience for Promote Process (24A); Oracle: New Redwood Process to Promote and Change Position (24A); Oracle: Example of a Worker Promotion with Position Change in Redwood

TRANSFERS AND PROMOTIONS

Transfer or promotion from a requisition

Process | 3 min micro-learning

USE WHEN An employee accepted a job they applied for through recruiting.

1. Recruiting sends it to central HR.
2. Why central HR does it.
3. Stay in touch with the recruiter.
4. Check status with central recruiting.

WATCH-OUTS

- Don't submit these transfers yourself, and never create a direct hire for someone already in process.

Course: me5231979.github.io/HCM_Academy/courses/transfer-with-requisition/ · Sources: HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

TRANSFERS AND PROMOTIONS

Transfer or promotion without a requisition

Oracle HCM | 5 min micro-learning

USE WHEN A move is planned within your business unit, or a staff member is becoming faculty.

1. Open Employment Info and choose Transfer.
2. Select extra sections if pay changes.
3. Effective date: line it up with payroll.
4. Pick the transfer type.
5. Update the assignment fields, then Submit.

WATCH-OUTS

- Positions can't move between business units. A new business unit needs new positions.
- A transfer that came from applying for a job is processed by central HR. See Transfer or promotion from a requisition.
- Open item: the 5-business-day internal posting rule for internal moves is a separate initiative.

Course: me5231979.github.io/HCM_Academy/courses/transfer-without-requisition/ · Sources: HCM training session 2, requisitions (Stephanie Commo), Sep 9, 2026

OFFBOARDING

Voluntary termination

Oracle HCM | 7 min micro-learning

USE WHEN An employee resigns.

1. Open Terminate Employment for the employee.
   - Quick Actions > Terminate Employment > select the employee, or
   - Search the employee's name > Terminate Employment.
2. Notification date: the day they told you.
3. Termination date: their last day.
4. Action: Voluntary separation. Reason: for example, Resigned.
5. Click Continue.
6. Revoke access: After termination is standard.
7. Leave the payroll eligibility field as defaulted.
8. Last working day: optional. Enter it if known.
9. Click Submit.

WATCH-OUTS

- The termination stops pay. Don't send a separate payroll request.
- Open item: the seniority dates screen is no longer editable since Redwood. Skip it for now.

Course: me5231979.github.io/HCM_Academy/courses/voluntary-termination/ · Sources: Briana Knowles walkthrough, Oct 20

OFFBOARDING

Reduction in force (RIF)

Oracle HCM | 7 min micro-learning

USE WHEN A position is eliminated.

1. Open Terminate Employment for the employee.
2. Notification date: the day they were notified.
3. Termination date: the end of the 60-day notice.
4. Action: Involuntary termination. Reason: Reduction in force.
5. Click Continue, then set revoke access.
6. Leave payroll eligibility as defaulted.
7. Last working day, by scenario.
   - Non-working notice (paid, no work, equipment returned now): last working day = notification date.
   - Working notice (finishing projects): leave blank, or enter the last day of the notice period.
8. Click Submit.

WATCH-OUTS

- The separation agreement sets which scenario applies. Confirm before entering.
- Most RIFs are non-working notice.

Course: me5231979.github.io/HCM_Academy/courses/reduction-in-force/ · Sources: Briana Knowles walkthrough, Oct 20; Award Compensation Elements Resource Guide (updated 01/17/2023)

OFFBOARDING

Involuntary termination (misconduct)

Oracle HCM | 6 min micro-learning

USE WHEN An employee is terminated for misconduct.

1. Talk to your PCB consultant and department leadership first.
2. Open Terminate Employment for the employee.
3. Notification date and termination date: usually today.
4. Action: Involuntary termination. Reason: Misconduct.
5. Click Continue.
6. Revoke access: Immediately or After termination, per your PCB consultant.
7. Rehire field: No or Not specified, per your PCB consultant and leadership.
8. Last working day: today, or leave blank.
9. Click Submit.

WATCH-OUTS

- Don't start the transaction until access timing and the rehire field are settled.
- Open item: confirm the exact name of the rehire eligibility field in Vanderbilt's Oracle.

Course: me5231979.github.io/HCM_Academy/courses/involuntary-termination/ · Sources: Briana Knowles walkthrough, Oct 20

OFFBOARDING

Ending assignments vs. terminating employment

Oracle HCM | 4 min micro-learning | Pending SME review

USE WHEN Someone is leaving a job and you need to decide whether they are leaving one job or leaving Vanderbilt employment.

1. Count the person's assignments in Employment Info.
2. Leaving everything? Use Terminate Employment.
3. Keeping at least one job? End only the job that stops.
4. Ending the only assignment? You must terminate.
5. Ending the primary assignment? Make another one primary first.

QUICK COMPARE

Question	End Assignment	Terminate Employment
Ends	One assignment	Work relationship and all assignments
Use when	Person keeps another job	Person leaves all jobs
Only assignment	Not allowed	Required
Rehire and access	Not set here	Set eligible for rehire; revoke access

WATCH-OUTS

- Terminating someone who keeps another job stops pay for that job too. Check assignments before you terminate.
- Open item: confirm which End Assignment entry point Vanderbilt uses (Change Assignment > End Assignment or the termination page), since it depends on the termination version configured.

Course: me5231979.github.io/HCM_Academy/courses/end-assignment-vs-terminate/ · Sources: Oracle: Terminations; Oracle: Ending Assignments and Terminating Work Relationships; Oracle: Termination and Resignation Version 2 versus Version 3

OFFBOARDING

How to handle a termination when an employee has multiple assignments

Oracle HCM | 5 min micro-learning | Pending SME review

USE WHEN Someone you need to offboard holds more than one assignment, possibly in another school or department.

1. List every active assignment and find the primary one.
2. Ask: is the person leaving all jobs or only yours?
   - Keeps a job: End Assignment on yours
   - Leaves all: Terminate Employment
3. Coordinate with the HCM who owns the other assignment.
4. If your job is primary and they keep another, change primary first.
5. Submit End Assignment or Terminate Employment with the right dates.
6. Confirm the result in Employment Info.

WATCH-OUTS

- Terminate Employment on a person who keeps another job stops pay for that job too.
- Move any direct reports on the ending assignment to a new manager before it ends.
- Open item: confirm Vanderbilt's rule for who submits when the jobs sit in different business units.

Course: me5231979.github.io/HCM_Academy/courses/terminate-multiple-assignments/ · Sources: Oracle: Terminations; Oracle: Ending Assignments and Terminating Work Relationships; Oracle: Using Global Human Resources, Work Relationships

OFFBOARDING

Offboarding process requirements

Process | 6 min micro-learning | Pending SME review

USE WHEN An employee is leaving and you need to make sure every offboarding step happens.

1. Confirm the type of exit and get advice when needed.
2. Check assignments and move direct reports first.
3. Submit Terminate Employment with the right dates.
   - Access: After termination is standard
   - Leave payroll eligibility as defaulted
4. Let payroll handle final pay once the termination is in.
5. For non-exempt employees, get the final UKG time card approved.
6. Review costing for the ending assignment.
7. File records in Document Records.
8. Close out the rest: equipment, exit survey.

WATCH-OUTS

- Do not terminate someone who keeps another job; end only your assignment.
- If a termination must be undone, Oracle can reverse it and re-enable access, but fix it fast so pay is not affected.
- Open item: confirm Vanderbilt's process and owners for equipment return, the exit survey, and final timecard approval for non-exempt employees.

Course: me5231979.github.io/HCM_Academy/courses/offboarding-requirements/ · Sources: Oracle: Terminations; Oracle: Redwood Experience for Terminate Employment and Resign From Employment Pages (24C); Oracle: About Reversing Terminations

04

SECTION 04

Leave Management

Recording time away and leaves of absence.

Entering and managing FMLA/TMLA transactions (continuous vs. intermittent) 60

Leave administration workflows within Oracle 61

Managing Exempt Time Off in Oracle 62

LEAVE MANAGEMENT

Entering and managing FMLA/TMLA transactions (continuous vs. intermittent)

Oracle Absence Management | 7 min micro-learning | Pending SME review

USE WHEN You have an approved FMLA or TMLA leave and need to record it in Oracle.

1. Confirm the approval and how the leave will be taken: continuous, intermittent, or reduced schedule.
   - Continuous: one start and end date
   - Intermittent or reduced: record time as it is taken
2. Open Add Absence for the employee and pick the absence type that matches the approval.
3. Continuous: enter one absence with the approved start and end dates.
4. Intermittent or reduced schedule: enter each occurrence with the actual time taken.
5. Attach supporting documents if the absence type requires them.
6. Submit and track the approval with the notifications bell.
7. File the approval letter as a Document Record: Leave and Accommodation Documentation.

CONTINUOUS VS. INTERMITTENT VS. REDUCED SCHEDULE

Type	What it looks like	How you enter it
Continuous	One unbroken block of time off	One absence, start and end dates
Intermittent	Separate blocks for one reason (e.g., treatments)	One absence per occurrence, actual time
Reduced schedule	Fewer hours per day or week	Actual hours missed, per day or week

WATCH-OUTS

- Intermittent leave entered as one long block overstates the time used. Enter only the time actually taken.
- Open item: which Oracle absence types Vanderbilt uses for FMLA, TMLA (TPLA), and FMLA running at the same time as state leave, and who enters intermittent occurrences, must be confirmed.
- Open item: Vanderbilt's leave process is pending review by Sheila, the Leave SME.

Course: me5231979.github.io/HCM_Academy/courses/fmla-tmla-transactions/ · Sources: DOL: Fact Sheet #28, The Family and Medical Leave Act; DOL: FMLA Frequently Asked Questions; Oracle: Using Absence Management; Oracle: FMLA Absence Plans and Absence Types; TN Department of Labor: Tennessee pregnancy and parental leave law (T.C.A. 4-21-408)

LEAVE MANAGEMENT

Leave administration workflows within Oracle

Oracle Absence Management | 6 min micro-learning | Pending SME review

USE WHEN You need to know who approves a leave request, where it is stuck, or how to change one that is already submitted.

1. Know how a request starts: the employee submits it, or you enter it with Add Absence.
2. Know where it routes: by default, to the employee's line manager.
3. Approvers act from the notification: approve, reject, or push back.
4. Track progress with the notifications bell at the top of Oracle.
   - Submitted or Awaiting approval: still with an approver
   - Scheduled or Completed: approved
5. To change a submitted or approved absence, edit it or withdraw it.
6. Resubmit after a withdrawal or rejection with the corrected details.

COMMON ABSENCE STATUSES IN ORACLE

Status	What it means
Submitted / Awaiting approval	Waiting on an approver
Scheduled	Approved, in the future
Completed	Approved, in the past
Awaiting withdrawal approval	Withdrawal requested, not yet approved
Withdrawn	Cancelled; no longer counts

WATCH-OUTS

- A request sitting with an approver has not reached payroll. Chase approvals before the payroll cutoff.
- Open item: Vanderbilt's approval routing for each absence type (who approves, whether HR or the Leave team is in the chain, what happens if an approver does not act) must be confirmed.
- Open item: Vanderbilt's leave process is pending review by Sheila, the Leave SME.

Course: me5231979.github.io/HCM_Academy/courses/leave-workflows/ · Sources: Oracle: Using Absence Management; Oracle: Absence Recording Statuses; Oracle: Overview of HCM Configurable Workflow Notifications; Oracle: Absence Management 24D What's New

LEAVE MANAGEMENT

Managing Exempt Time Off in Oracle

Oracle Absence Management | 5 min micro-learning | Pending SME review

USE WHEN You need to review, approve, enter, or correct time off for an exempt employee.

1. Go to Our Workforce > Quick Actions (Show More) and find the absence quick actions.
2. Check the balance with Absence Balance before you approve or enter time.
3. Review what is already recorded in Existing Absences.
4. Approve requests from the notifications bell.
5. Enter time off for someone with Add Absence when needed.
6. Correct mistakes in Existing Absences: edit or withdraw, don't double-enter.
7. Finish before the exempt payroll cutoff.

WATCH-OUTS

- Exempt time off belongs in Oracle; non-exempt time off belongs in UKG. Check exempt status before you enter anything.
- Open item: which quick actions HCMs see under Our Workforce, and whether HCMs approve exempt time off or only managers do, must be confirmed on screen.
- Open item: Vanderbilt's leave process is pending review by Sheila, the Leave SME.

Course: me5231979.github.io/HCM_Academy/courses/exempt-time-off/ · Sources: Oracle: How do I use quick actions to manage absences?; Oracle: Using Absence Management; Oracle: Absence Recording Statuses

SECTION 05

Costing Management

Charging each salary to the right account.

Costing fundamentals 64
How employee costing impacts payroll and financial reporting 65
When costing must be updated 66
Enter costing for a person 67
Change existing costing 68

COSTING MANAGEMENT

Costing fundamentals

Oracle HCM | 7 min micro-learning

USE WHEN You need to decide whether an employee needs costing entered or can stay on the default.

1. **Know the three levels Vanderbilt uses.**
   - Element (one type of pay on an assignment, such as a lump sum): if costed, that pay goes to the element's account.
   - Assignment (the person's job): if costed, all pay on the job follows it, except elements costed on their own.
   - Work unit default: every assignment sits in one work unit. With no specific costing, pay goes to the work unit's entity and financial unit, general unrestricted funds (05), the natural account for that type of pay, and program and activity 000.
2. **Open Costing for Persons.**
3. **Search the person with Advanced Search and the right Effective As-of Date.**
   - Use today's date (or the first day of the current pay period) to see what applies now.
4. **Select the person, then select the Assignment on the left.**
5. **Read what you see.**
6. **Ask your finance partner whether your department splits the work unit by program code.**
   - No split: leave the default. Nothing to enter.
   - Split: enter costing for each person. Otherwise they default to program 000.
7. **Ask whether finance wants any role or payment tracked separately.**
8. **Click Done.**

> **WATCH-OUTS**
> - Some departments set default costing at the work unit level, others at the business unit level. Know which applies to you.
> - Costing touches payroll and financial reporting. Wrong costing charges the wrong budget.
> - Costing practice varies by department. Validate with your finance partner.

Course: me5231979.github.io/HCM_Academy/courses/costing-fundamentals/ · Sources: Alex Enferadi session, Oct 20; Training Guide: Enter or Edit Costing for Persons (updated 01/27/2022)

COSTING MANAGEMENT

How employee costing impacts payroll and financial reporting

Oracle HCM | 6 min micro-learning | Pending SME review

USE WHEN You set up or review costing for a hire, transfer, or funding change, or a finance partner questions where salary was charged.

1. Costing is set in Costing for Persons.
2. Oracle uses the most specific level first: element, then assignment, then work unit default.
   - Element > Assignment > Work unit default
3. Payroll creates costing results, then transfers them to the General Ledger.
4. Grant-funded salary depends on correct splits.
5. Costing follows a person who transfers business units; review it.
6. Late fixes go through cost adjustments or retroactive costing.
7. Check your area with the Departmental Playbook reports.

WATCH-OUTS

- After a BU transfer, costing does not reset on its own. Review it every time.
- Blank costing is not wrong by itself; it means the work unit default applies. Confirm the default is the account you want.
- Open item: confirm how Vanderbilt handles grant labor distribution and the deadline to fix costing before a payroll run.

Course: me5231979.github.io/HCM_Academy/courses/costing-impacts/ · Sources: Oracle: Administering Global Payroll Costing, Cost Hierarchy; Oracle: Payroll Setup Tasks to Transfer Costs to General Ledger; Oracle: Correct Costing for Payroll Run Results; Oracle: Labor Schedules

COSTING MANAGEMENT

When costing must be updated

Oracle HCM | 6 min micro-learning

USE WHEN A job, team, or funding change happens to one of your employees.

1. How to check costing for any event below.
2. New hire: is the default OK, or does costing need a program code?
3. Team change within the work unit: is the program code still correct?
4. Transfer to another department or business unit: does the old costing still apply?
5. Bonus, lump sum, or interim pay: should it charge a different COA than salary?
6. Another work unit pays a bonus for your employee: whose COA, and who enters it?
7. Split funding (for example, another area pays 20%): split costing setup.
8. Before every HCM Transaction Cutoff: review costing for your unit.

WATCH-OUTS

- Costing follows an employee who changes business units. Review it after every BU transfer so the new area isn't charged to the old accounts.
- Most of these scenarios don't have walkthroughs recorded yet. Ask your finance partner when unsure.
- Split funding and cross-unit bonuses may become reference resources rather than core training. To be decided by the HCM group.

Course: me5231979.github.io/HCM_Academy/courses/when-to-update-costing/ · Sources: Alex Enferadi session, Oct 20

COSTING MANAGEMENT

Enter costing for a person

Oracle HCM (Costing for Persons) | 10 min micro-learning

USE WHEN The default won't work and the person or a payment needs specific costing.

1. **Open Costing for Persons.**
2. **Search the person with Advanced Search and the right Effective As-of Date.**
   - Use the first day of the current or future pay period the costing should start (the Pay Period Start Date on the payroll calendar).
   - Past date, such as a new hire's start: use that date. The standard path only offers today forward.
   - Prior pay periods (retro) also need the Retro Costing Request Form. See the watch-outs.
3. **Select the person, then select the Assignment on the left.**
4. **Click Actions > Create and choose what to cost.**
   - Create Costing: the whole assignment.
   - Create Costing of Element: one type of pay, such as a bonus. Then pick the Element Name; use the code ending in Earnings Results (for example, BON Earnings Results). Codes are listed in the HCM Award Compensation Resource Guide on the HCM Specialist resource page.
5. **Enter the effective date and click OK.**
6. **Add a costing line: click Actions > Create, or the + icon.**
7. **Enter each line. Percentages must total 100%.**
   - COA string: Entity, Net Asset Class (for example, 05), Financial Unit, Program and Activity (000 if unused), VU_Function. Use default zeros for InterEntity (000), Future 2 (0), and the POET fields (0000).
   - Account: leave it blank for an assignment (payroll fills it). For an element, enter it: 5110 faculty, 5120 staff, 5130 student.
   - POET string (grants): in the COA fields always enter the payroll clearing string 380.05.38600.5140.000.000.000.VUI.0, then Project Number, Organization, Expenditure Type (SalFac, SalStaff, or SalStud), and Task.
   - Leave Allocation Type blank.
8. **Click Submit.**
9. **Click Done, then run the HCM Cost Allocation Verification Plan report.**

WATCH-OUTS

- Costing applies to a full pay period. Oracle uses the costing in effect on the Pay Period End Date and does not prorate.
- Current and future changes: enter by the HCM Transaction Cutoff.
- Prior periods (retro): also submit the Retro Costing Request Form (Salary) to the Research Finance Team by the Retro Change Cutoff, usually two business days before the HCM Transaction Cutoff. Include a cost transfer memo if an externally funded grant is affected.
- Vanderbilt's guide is dated 01/27/2022, before the Redwood screens. Confirm field names in a recorded demo.

Course: me5231979.github.io/HCM_Academy/courses/enter-edit-costing/ · Sources: Training Guide: Enter or Edit Costing for Persons (updated 01/27/2022); Briana Knowles walkthrough, Oct 20; Alex Enferadi session, Oct 20

COSTING MANAGEMENT

Change existing costing

Oracle HCM (Costing for Persons) | 10 min micro-learning

USE WHEN Costing already exists and needs to start differently, be fixed, stop, or be removed.

1. **Decide which action you need.**
2. **Open Costing for Persons and search with the action's date.**
   - Update, Correct, or Delete Record: the first day of the pay period the change applies to.
   - End Date: the last day of the pay period the costing should apply to.
3. **Select the Assignment (or Element) on the left.**
4. **Click History and review every costing period.**
5. **Click Edit and choose the action.**
   - Update: enter the new costing lines. With no end date, it continues going forward.
   - Correct: enter the costing as it should have been for the whole selected period.
   - End Date: stops all costing from that date. An assignment returns to the work unit default; an element returns to the assignment's costing.
   - Delete Record: confirm the pop-up with OK. The previous record's end date extends to close the gap.
6. **Enter or adjust the lines so they total 100%, then click Submit.**
7. **Prior periods: submit the Retro Costing Request Form (Salary).**
8. **Click Done, then run the HCM Cost Allocation Verification Plan report.**

WHICH ACTION, WHICH SEARCH DATE

Action	Use it to	Search on
Update	Start a different costing as of a date. History is kept and a new record is added.	First day of the pay period the new costing starts
Correct	Revise an existing costing for its entire date range.	First day of the pay period it should have started
End Date	Stop costing as of a pay period end date.	Last day of the last pay period it should apply
Delete Record	Remove a costing record completely.	First day of the pay period of the record to remove

WATCH-OUTS

- Don't End Date a prior period if you want to keep costing records that come after that date. End Date ends everything from that date forward.
- After End Date, use Create (not Update) to add costing again later.
- Dates matter most. Check History before every change.
- Vanderbilt's guide is dated 01/27/2022, before the Redwood screens. Confirm labels in a recorded demo.

Course: me5231979.github.io/HCM_Academy/courses/change-existing-costing/ · Sources: Training Guide: Enter or Edit Costing for Persons (updated 01/27/2022)

06

SECTION 06

Student & Faculty Hiring and Assignments

Hiring students and faculty, from choosing the worker type to changing assignments between terms.

Student hiring process and requirements 70
Student Workers 71
Add a Work Relationship or add an Assignment? 72
Student and faculty assignment changes 73

STUDENTS

Student hiring process and requirements

Process | 5 min micro-learning | Pending SME review

USE WHEN You need to bring a student onto your area's records and want to know which path and requirements apply.

1. **Decide the setup: paid student worker, service free stipend, or student expense only.**
   - Paid work: Student Workers course
   - Stipend, no services: Service Free Stipend course
   - Reimbursement only: Student Expense Only course
2. **Check the person's existing record before you add anything.**
3. **Add a Work Relationship for an N-only record; add an assignment if an E assignment exists.**
4. **Complete the compliance step that matches the setup.**
   - I-9 Section 2 due within 3 business days of first paid day
5. **Use the right hire reason and status when you convert or hire.**
6. **Track approvals and confirm the record before payroll cutoff.**

REQUIREMENTS BY STUDENT SETUP

Setup	I-9	Background check
Student worker (paid)	Yes	No
Service Free Stipend	No	No
Student Expense Only	No	No

WATCH-OUTS

- Do not use a stipend or expense-only setup to pay a student for work. If the student performs services for pay, they are a student worker.
- Open item: Vanderbilt owner for student eligibility (enrollment, hour limits, international student work authorization) is not yet documented. Confirm with your PCB consultant.
- Open item: Whether student hires come through Oracle Recruiting requisitions or a direct hire in your area.

Course: me5231979.github.io/HCM_Academy/courses/student-hiring-process/ · Sources: Oracle: Work Relationships; Oracle: How You Convert Pending Workers; USCIS: Completing Section 2, Employer Review and Attestation; DOL: Fact Sheet #17S

STUDENTS

Student Workers

Oracle HCM | 6 min micro-learning | Pending SME review

USE WHEN A department wants to pay an enrolled student for work and you need to set up or extend the record.

1. Search the student in Our Workforce > Employment Info.
2. N record only: add the employment Work Relationship. Existing E assignment: add an assignment.
   - N only: add Work Relationship
   - Has E: Add Assignment
3. Enter the position and assignment details, including the end date.
4. Set hire reason Hire employment and status Active payroll eligible.
5. Complete the I-9 within three business days of the first paid day. No background check.
   - Original documents, examined in person
6. Submit, track approval with the notifications bell, then confirm costing and UKG.

WATCH-OUTS

- An end date that does not match the work period keeps a student active and payable after they stop working. Review end dates at every term change.
- Graduate teaching and research assistants may be treated differently under the FLSA (DOL Fact Sheet #17S). Do not decide exemption yourself; ask Compensation.
- Open item: Vanderbilt rules on student hour limits, eligibility checks, and who confirms enrollment are not yet documented.

Course: me5231979.github.io/HCM_Academy/courses/student-workers/ · Sources: Oracle: Work Relationships; Oracle: Assignments; Oracle: How You Convert Pending Workers; USCIS: Form I-9 Fact Sheet for Students; DOL: Fact Sheet #17S

STUDENTS

Add a Work Relationship or add an Assignment?

Oracle HCM | 4 min micro-learning | Pending SME review

USE WHEN You are about to set up paid work for a student and need to pick Add Work Relationship or Add Assignment.

1. Search the student in Our Workforce > Employment Info and look at the work relationships.
2. Only an enrolled student (N) record: add the employment Work Relationship.
3. Already has an employee (E) assignment: add an assignment.
   - End it later with End Assignment
4. Never create a second person record.

PICK THE ACTION

Student has	Action
Only an enrolled student (N) record	Add the employment Work Relationship
An employee (E) assignment	Add an assignment

WATCH-OUTS

- Adding a Work Relationship when an E assignment exists creates a duplicate employment relationship that is hard to unwind.
- Open item: Confirm the exact Quick Action names Vanderbilt uses for these two actions in Our Workforce.

Course: me5231979.github.io/HCM_Academy/courses/work-relationship-vs-assignment/ · Sources: Oracle: Work Relationships; Oracle: Assignments

CHANGES AND APPROVALS

Student and faculty assignment changes

Oracle HCM | 6 min micro-learning | Pending SME review

USE WHEN A term is ending or starting and a student or faculty assignment needs to change or end.

1. Start at Our Workforce > Employment Info and search the person.
2. Use a direct action for a single change.
   - One field: direct action
   - Several fields: Change Assignment
3. To end an assignment at term end, use End Assignment in Change Assignment.
4. Use a transfer, not Change Assignment, to move someone to another position in the BU.
5. Review costing and fields that do not flow from the position.
6. Submit before payroll cutoff and track approval with the notifications bell.

WATCH-OUTS

- An assignment left open past term end keeps a student or faculty member active and payable.
- Moving a person to another position in the BU is a transfer. Do not use Change Assignment for it.
- Open item: Vanderbilt's term-change calendar and whether student assignments are ended or extended in bulk.

Course: me5231979.github.io/HCM_Academy/courses/student-faculty-changes/ · Sources: Oracle: Redwood Experience for Change Assignment Process (24A); Oracle: Enhancements to Redwood Change Assignment Process (24D); Oracle: Assignments

SECTION 07

Document Records & Reporting

Keeping employee documents complete and pulling the reports your area needs.

Add a document record 75
Introduction to BI Reporting and the Departmental Playbook 76
Reporting 101 77
Reporting 201 78
Reporting 301 79

DOCUMENT RECORDS & REPORTING

Add a document record

Oracle HCM (Document Records) | 7 min micro-learning

USE WHEN You have a final, signed document to file: discipline, a compensation letter, a performance review, or a leave or accommodation approval.

1. Open Document Records for the employee.
2. Click Add.
3. Document Type: pick the type that matches.
4. Name: use the naming convention shown in the description.
5. Issued On: the date the document was presented to the employee.
6. From Date and To Date: the period the document covers.
7. Leave Issuing Comments and Context Value blank.
8. Attach the final signed copy and click Submit.

TYPES, NAMES, AND DATES

Document Type	Use for, names, and dates
Performance and Discipline	Written, Final, or Termination level (Discipline or PACP). Names like "Written Warning - Discipline". Discipline: To Date is 12 months after the From Date. PACP: To Date is the end of the plan (for example, 90 days).
Compensation Letters	Annual increase, bonus, interim pay, and salary increase letters (equity, market, reclass). Use From and To Date for interim or time-limited pay.
Performance Review	Any review or goal-setting document. Names like "Performance Review - (review dates)". From and To Date = the period reviewed.
Leave and Accommodation Documentation	Approval letters for FMLA, Non-FMLA, State Leave, Personal Leave, and Accommodation. From and To Date = the approved timeframe.

WATCH-OUTS

- Attach only the final signed copy.
- Questions about which type to use go to your HR Consultant.
- Confirm the exact Document Records menu path in Vanderbilt's Oracle during a recorded demo.

Course: me5231979.github.io/HCM_Academy/courses/add-document-record/ · Sources: Personnel Files: Document Records, Oracle User Guide

DOCUMENT RECORDS & REPORTING

Introduction to BI Reporting and the Departmental Playbook

Oracle BI (OTBI) | 5 min micro-learning | Pending SME review

USE WHEN You need a list or check across your area, such as everyone's costing, rather than one person's record.

1. Open Reports and Analytics (Navigator > Tools > Reports and Analytics).
2. Know the folders: Shared Folders for official reports, My Folders for yours.
3. Search or browse to the report, then click its name to open it.
4. Use the Departmental Playbook costing reports.
   - HCM Assignment Cost Allocation Plan
   - HCM Element Cost Allocation Plan
   - HCM Cost Allocation Verification Plan
5. Expect to see only the people your security allows.

WATCH-OUTS

- Bad data in, bad data out. A report only reflects what was entered in Oracle.
- Do not save changes over a shared report. Save your own copy in My Folders.
- Open item: confirm where the Departmental Playbook lives in the catalog (folder path) and whether Vanderbilt exposes Reports and Analytics on a different menu.

Course: me5231979.github.io/HCM_Academy/courses/bi-intro-playbook/ · Sources: Oracle: View Analytics, Reports, and Dashboards; Oracle: Where to Save Analytics and Reports; Oracle: HCM Subject Areas for Transactional Business Intelligence

DOCUMENT RECORDS & REPORTING

Reporting 101

Oracle BI (OTBI) | 5 min micro-learning | Pending SME review

USE WHEN You need to run an existing catalog report for your area and trust what it shows.

1. Open Reports and Analytics and find the report.
2. Answer the prompts.
3. Set the as-of or effective date.
4. Run the report and wait for results.
5. Read the results with the prompts in mind.
6. Rerun with new prompts instead of editing the report.

WATCH-OUTS

- Date matters. A person hired next week will not appear on a report run as of today.
- Results show only people within your data security.
- Open item: confirm which standard HCM reports Vanderbilt expects HCMs to run and where they are stored.

Course: me5231979.github.io/HCM_Academy/courses/reporting-101/ · Sources: Oracle: View Analytics, Reports, and Dashboards; Oracle: HCM Subject Areas for Transactional Business Intelligence

DOCUMENT RECORDS & REPORTING

Reporting 201

Oracle BI (OTBI) | 6 min micro-learning | Pending SME review

USE WHEN You run the same report often, need it in Excel, or want it delivered without logging in.

1. Narrow results with prompts and filters.
2. Export: choose Formatted or Data, then the format.
   - Large report: export to CSV, then open in Excel
3. Save your customized version in My Folders.
4. Schedule delivery with an agent (More > Schedule).
5. Set the schedule and the delivery condition.
6. Handle exported data securely.

PICK THE RIGHT OUTPUT

Need	Use
Shareable, formatted view	Export Formatted (Excel or PDF)
Data to sort or pivot	Export Data (CSV or Excel)
Same report every week	Schedule an agent
Your own variation	Save As in My Folders

WATCH-OUTS

- Agent delivery in Excel or CSV is limited to 25,000 rows.
- A copy in My Folders does not get updates made to the shared original.
- Open item: confirm Vanderbilt rules for storing and emailing exported HR data and whether agents are enabled for HCMs.

Course: me5231979.github.io/HCM_Academy/courses/reporting-201/ · Sources: Oracle: Create Filters for Columns (OTBI); Oracle: Automate Business Processes with Agents (OTBI); Oracle: Where to Save Analytics and Reports

DOCUMENT RECORDS & REPORTING

Reporting 301

Oracle BI (OTBI) | 8 min micro-learning | Pending SME review

USE WHEN No catalog or Playbook report gives you the columns or filters you need.

1. Create a new analysis and pick a subject area.
2. Add only the columns you need on the Criteria tab.
3. Add filters to limit rows.
4. Add prompts if others will run it for different values.
5. Check results against known records.
6. Save to My Folders.

WATCH-OUTS

- Hiding a column is not security. Data security comes from Oracle roles, and every viewer sees only what their roles allow.
- If you do not see Create > Analysis, you may not have a BI author role.
- Open item: confirm which BI roles HCMs have, who can publish to Shared Folders > Custom, and the request process for new shared reports.

Course: me5231979.github.io/HCM_Academy/courses/reporting-301/ · Sources: Oracle: Create Your First Analysis (OTBI); Oracle: HCM Subject Areas for Transactional Business Intelligence; Oracle: Create Filters for Columns (OTBI); Oracle: Where to Save Analytics and Reports
